5K Course on Scenic Rail Trail

New Paltz, NY

Asbestos exposure, even in small amounts, is the only known cause of Mesothelioma. People throughout our community have been exposed - from 9/11 workers, to our veterans, plumbers, construction workers, firefighters and IBM workers (to name a few). There is only **ONE** FDA approved medication for the treatment of Mesothelioma. Cutting edge research is on the verge of fascinating and promising treatments. Funding is needed to finish phase 3 trials and get these treatments FDA approved & make them available to all those affected by this deadly disease.

You can make a difference in their lives.

The Community Partnership for a Safer New Paltz is hosting this 5K Run/Walk to benefit the Mesothelioma Applied Research Foundation to help them make these treatments become available to all those lives in need of a cure!
